PARISH MAPS.

THE ORDNANCE MAPS OF PARISHES IN ENGLAND AND WALES, ON THE
SCALE OF $\frac{1}{2500}$ OR 25·344 INCHES TO A MILE, ARRANGED BY
COUNTIES.

This scale is nearly equivalent to one square inch to an acre. Indexes to the plans of the parishes are bound up in the Area Books, by which the number of the sheets including any particular locality may be seen. Each inclosure is distinguished by a number, and on maps published since 1884, the acreage is given beneath the number; in such cases an Area Book is not published.

NOTE.—The maps of those parishes in the following table which are distinguished by an asterisk (thus *) do not include the moorlands or uncultivated portions. For the maps of such portions of parishes, reference should be made to the 6-inch map of the county.

PARISH INDEXES.—These indexes are on the scale of one inch to one mile, and give very useful information. They show the position practically of every farm in a parish, they give the boundaries and names of every parish represented on the index, and they give the price of every $\frac{1}{2500}$ plan included in that area. Price 2*d.* each.
